Appendices

Appendix A. Community infrastructure audit	55
Appendix B. Maps of Community infrastructure	56

1.0 Introduction

Kempsey Shire Council has commissioned Ethos Urban in partnership with Otium Planning Group to prepare a Community Infrastructure Plan for the shire. This plan will ensure that community facilities, services and spaces meet the needs of the existing and future community. It will also assist with ongoing asset management and inform future investment decisions by Council.

The Macleay Valley Community Infrastructure Plan (CIP) will provide a practical guide for planning and managing community infrastructure across the Shire that is responsive to the population and demographic profile, local values and aspirations as well as the role and characteristics of the shire's diverse townships. The overarching objectives of the CIP are to:

1. Clearly articulate current supply and benchmarked need for community infrastructure.
2. Identify current and future gaps in provision of community infrastructure.
3. Deliver clear guidance on how community infrastructure may best be provided and managed to sustain liveability and community wellbeing across the Shire.

1.1 Project approach

The Macleay Valley CIP will be developed over three stages, as outlined below.

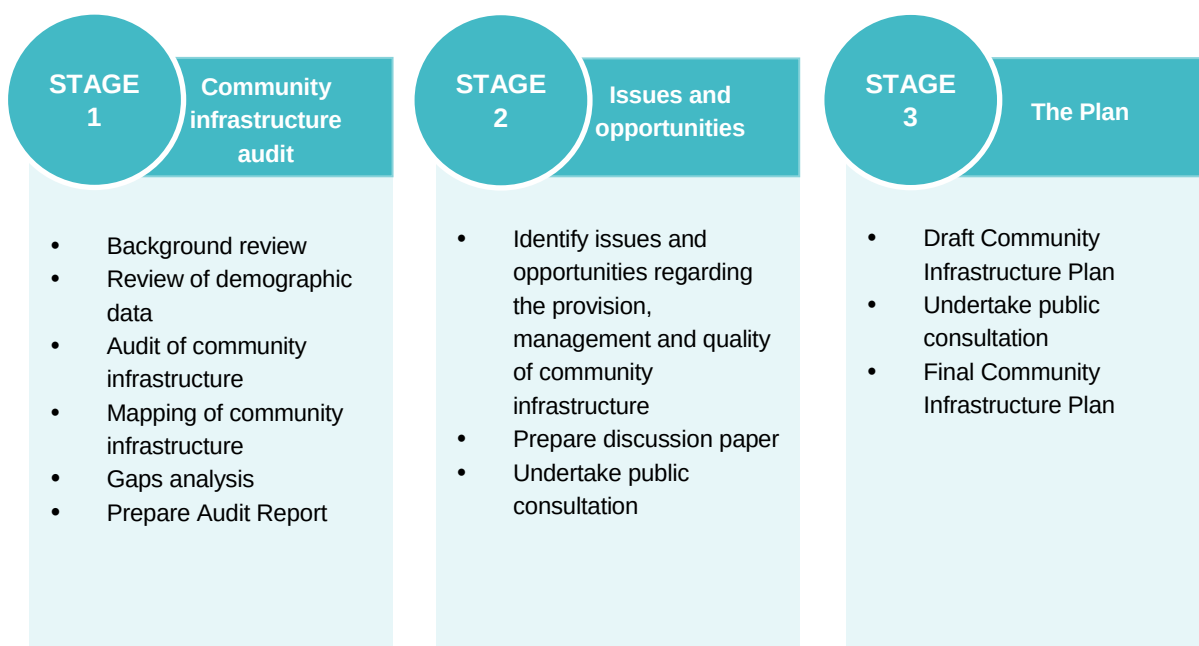

Figure 1: Diagram of Project Approach

1.2 Purpose of this report

This report is the key output for Stage 1 of the Macleay Valley CIP. It provides an overview of key policies and background reports which provide the strategic context for the plan. It presents key population and demographic characteristics, trends and projections which will impact the future demand for community infrastructure across the Shire. It also identifies existing community infrastructure across the shire, by type and location and contains an analysis of this existing supply based on the application of accepted rates of provision against the current and forecast population of the shire.

This report has been informed by some consultation with Council officers. No community consultation has been undertaken as part of the preparation of this analysis. The next project stage will involve engagement with local service providers, facility operators and local residents to understand local usage patterns, values and future aspirations.

1.3 What is community infrastructure?

Community infrastructure is a broad term used to describe the buildings and spaces that provide a range of services, activities and opportunities for the community. For the purposes of this plan community infrastructure include:

- Cultural buildings (e.g. community halls, art galleries and libraries).
- Education (e.g. childcare, schools and universities).
- Health services (e.g. hospitals and community health care)
- Open space (e.g. parks and playgrounds)
- Sporting facilities (e.g. stadiums, sporting fields and swimming pools).

Section 5.3 provides an overview of all community infrastructure across the Shire. A detailed breakdown has been provided in Appendix A of this report.

There are a range of departments and organisations involved in the provision and delivery of community infrastructure. This includes State government as well as the private, not-for-profit and community sector.

The focus on the CIP will be on Council-owned and operated community facilities, services and spaces.

1.4 Financial considerations

The Macleay Valley CIP will not give specific consideration to the ability of Council or community to fund the actions identified by the plan. Based on correspondence with Council officers it is understood that the financing of new facilities will be a challenge as it will result in increased levels of debt or the refocus of funds from other areas within Council. A key action, relating to the implementation of the Macleay Valley CIP, is for Council to identify funding priorities at a whole of Shire level with consideration to the findings and actions identified within the CIP.

2.0 Study area

The study area encompasses the whole Kempsey Shire. Kempsey Shire is located on the mid north coast of NSW approximately 450 kilometres north of Sydney and 50 kilometres north of Port Macquarie. The Shire covers 338,100 hectares or 3,381 square kilometres and features both rural and urban areas. The Shire extends from Kundabung in the South to Grassy Head in the north and Blackbird Flat in the west. The Shire is commonly referred to as the Macleay Valley, a title which has been adopted for this report and project.

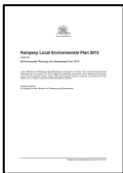

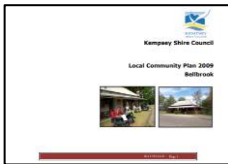

Figure 2: Map of Study Area

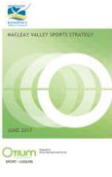

3.0 Key plans, policies and strategies

The following local government policies and documents were reviewed to understand the strategic context for the project. The below tables provide outline each of the policies reviewed, their purpose relevance to this project.

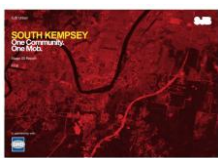

SHIRE WIDE POLICY

Community Strategic Plan (June 2017)	Operating Plan 2018-2019	Delivery Program 2017-2021	Community Infrastructure Asset Management Plan (2014)
			
Establishes a 10-year vision for the community including strategies and actions that aim to achieve the key community values of: - Being healthy - Being wealthy - Being safe - Being connected	Provides a summary of all the actions, programs and services Council will deliver in the financial year and aims to meet the objectives set out by the Delivery Program 2017-2021	Identifies the community's priorities, what Council can do to achieve the community's aspirations, focused on land use planning and identifying opportunities to attract investment.	The Asset Management Plan details information about infrastructure assets and actions required to provide an agreed level of service in the most cost effective manner. Defines the services to be provided, how they will be provided and the funds that will be required.
Relevance to CIP: Sets a range of goals associated with community values. The outcomes of this strategy have the opportunity to progress the achievement of these goals.	Relevance to CIP: Identifies infrastructure projects for delivery or investigation. Projects, of relevance to this strategy, include transport infrastructure upgrades and improvements to existing open spaces.	Relevance to CIP: Identifies infrastructure projects for delivery or investigation. Projects, of relevance to this strategy, include transport infrastructure upgrades and improvements to existing open spaces.	Relevance to CIP: Recommends developing a formal building asset rationalisation plan to manage surplus assets as well as completing a building condition assessment to identify defects.

Plans of Management (Various)	Kempsey Local Environmental Plan 2013	Kempsey Development Control Plan 2013	Kempsey Local Community Plans
			
The Local Government Act 1993 requires Council to have a plan of management in place for all public land that is classified 'community land'. This is to ensure that the operation and development of these community resources is guided by a framework that is considered by the community and formally adopted by the Council. Various plans of management are in place across the Shire to address the requirements of the Act.	LEP's guide planning decisions in the LGA and establish the requirements for the use and development of land.	Development Control Plans (DCPs) provide specific, more comprehensive guidelines for certain types of development, or small sections of the Kempsey Local Government Area. The detailed guidelines contained within a DCP are in addition to the provisions of the legal planning instrument (SEPP, REP or LEP). DCPs are important in the planning system because they provide a flexible means of identifying additional development controls and standards for addressing development issues without the need for a formal statutory plan. There are approximately 40 DCPs for different areas, uses, and types of development throughout the LGA.	Community Plans have been developed for Bellbrook, Crescent Head, Frederickton and Collombatti, Gladstone, Hat Heat, Kempsey Township, Smithtown, South West Rocks, Stuarts Point and Willarwarrin The Local Community Plans aim to develop a relationship between communities and Council, solve problems through creative thinking and identify actions to bring about improvements. These community plans provide a good understanding of what the community loves about their town and the challenges for the future.
Relevance to CIP: Sets out core objectives for community land categories.	Relevance to CIP: The LEP identifies a number of heritage listed buildings and community facilities throughout the shire.	Relevance to CIP: The DCP provides development requirements relating to matters such as car parking, building height and landscaping. New or developed community facilities will need to comply with these requirements. The DCP also contains requirements that apply to urban areas, rural areas and villages.	Relevance to CIP: The Local Community Plans provide an insight into what the communities love about their towns and the challenges. The Community Plans provide suggestions, with many communities consistently identifying they value quality infrastructure and improved community facilities in their towns.

Disability inclusion action plan (2017-2021)	Macleay Valley Sports Strategy (2017)	Kempsey Shire Bike Plan (2018)	Kempsey Corridor Master Plan (2012)
			
Aims to provide better access to Council infrastructure, services and facilities to ensure people with disabilities can fully participate in the community. The DIAP will be a key component of the Community Strategic Plan 2036 to be a 'Health, Wealth, Safe and Connected' community.	This strategy outlines council's role in the local sport sector, defines councils working relationship with other sporting organisations, identifies key issues relating to sport and established processes (strategies) for dealing with sport related issues now and into the future. Provides a facility planning and delivery program for new sporting facilities, including an asset management plan and sport development program.	Provides a framework for existing cyclist needs, future management and to establish opportunities for future development of the cyclist network within the shire.	Provides a framework for the planning and development of the former Pacific highway corridor section from the village of South Kempsey to the town of Kempsey and through to Frederickton
Relevance to CIP: All new/upgraded community facilities will need to be designed to ensure the key strategies and requirements of the DIAP are achieved for the community.	Relevance to CIP: Identifies key issues relating to sporting facilities in the Shire as well as priority actions to resolve these. Actions include upgrades to existing sporting facilities and organisational changes to promote and administer sport in the Shire.	Relevance to CIP: Identifies a list of prioritised infrastructure improvements within the Shire's main townships.	Relevance to CIP: Provides background of projects and initiatives identified as part of this project which relate to the outcomes sought by this strategy.

LOCAL POLICY

South West Rocks Open Space Strategy (2004)	South Kempsey Urban Design Framework and Social Plan – One Community One Mob (Dec 2012)	Crescent Head Master Plan 2017	Horseshoe Bay (South West Rocks) Master Plan (2019)
			
This study relates to the availability and adequacy of local and district open space facilities, identifies shortfalls and likely future requirements and provides recommendations for the future management of these spaces.	South Kempsey was identified as a high priority area by the Federal Governments “Closing the Gap” initiative. The Government identified seven priority areas for improvement and this report reflects on this and provides deliverable initiatives tailored for the South Kempsey Community.	Provides a framework for supporting the community in identifying and developing programs that invigorate the local economy, provide improved village public spaces, protect and conserve public lands for future generations, guard against inappropriate development and safeguard the character and quality of Crescent Head.	This document is currently being reviewed. The draft masterplan (dated 01.05.19) identifies: The master plan will become a strategic document guiding the provision, location and design of new facilities and infrastructure in the Horseshoe Bay precinct. Vision is to provide a public space for the community that celebrates the people and the place and enables environmental appreciation.
Relevance to CIP: Provides background of previous open space planning.	Relevance to CIP: There are a number of urban and social urban design principles relating to open space, movement, sustainability, inclusivity, education, culture and support that will be relevant to this strategy. A recommendation has been made to rationalise the number and coverage of the public open spaces so the quality and maintenance of the retained spaces can be improved.	Relevance to CIP: There is a need to improve areas of the foreshore, upgrade or provide new playgrounds and picnic facilities in high use areas and investigate improvements to the swimming pool (including new amenities building)	Relevance to CIP: The plan identifies improvements to open space including space for markets and an amphitheatre.

4.0 Community infrastructure audit approach

The purpose of this report is to provide an initial assessment of the existing supply of community infrastructure across Kempsey Shire and identify any gaps in the network, currently and in the future. To do this, a range of service catchments have been defined and the current supply of community infrastructure in the Shire has been benchmarked against desired service standards.

Limitation of this approach

It is acknowledged that benchmarking provides a broad indication of need only. Standards of service are based on overall population and are generally used to ensure equitable access to facilities across a region. Limitations of relying *solely* on benchmarks to inform community infrastructure planning include:

- Standards do not consider the demographic characteristics of the population (e.g. cultural diversity, mobility, socio-economic factors).
- They do not consider the identified local needs, values or community aspirations.
- Benchmarks also do not consider the capacity or condition of existing community infrastructure in an area.
- Benchmarks typically do not consider the opportunity for spaces can be used for integrated or multiple purposes.

The next project stage will involve consultation with local community infrastructure providers and residents to address some of the identified limitations of the benchmarking approach.

4.1 Rates of provision

This report includes rates of provision used to determine the need for different types of community infrastructure. These were based on the Clarence Valley Council's *Cultural and Community Facilities Plan 2009* and the NSW Government Architect Draft Guideline on *Open Space for Recreation 2018*.

The Clarence Valley Council's Cultural and Community Facilities Plan sets out rates of provision for various community facilities such as libraries and community spaces. Clarence Valley has a comparable settlement pattern and population size to the Macleay Valley as well as a similar collection of community facilities. Council has previously used plans and strategies adopted by Clarence Valley Council to inform Council's own plans and strategies (e.g. the Macleay Valley Economic Plan currently underway). For these reasons the rates of provision in this document were adopted. Minor variations were made to accurately reflect the types of community facilities present across the Shire and the population catchments used.

The NSW Government Architect Draft Guideline on *Open Space for Recreation 2018* represents a shift away from simple population to space based standards of provision. The guideline expands on this by providing performance standards related to the types of recreation opportunity and functional elements of open space. In this first stage audit report the application of population-based rates of provision for open space and sporting facilities are presented; the higher-level criteria will be applied in further stages. The rates of provision in this document were adopted as they have accepted by other various regional NSW local governments as part of their open space and sports planning.

The rates of provision for community facilities, such as libraries and community spaces, are based on population thresholds. Open space and sporting facilities, such as parks and sporting fields, are based on hectares to population thresholds. Table 1 summarises the rates of provision by community infrastructure category and catchment.

Table 1: Adopted rates of provision for benchmarking

Community infrastructure category	Locational catchment	Description	Rate of provision (population and area based)
Community facilities*			
Community space	Local	Community buildings which offer general meeting space, basic amenities and break-out spaces such as community gardens.	1:5,000 – 10,000
Art gallery	Local	Space dedicated for the display and exhibition of art.	1:15,000 – 30,000
Branch library	Local	Provides a collection of books and other material as well as meeting spaces.	1:6,000 – 15,000
Library	Shire	Provides a central collection of books and other material as well as meeting space. Differs from a branch library based on its larger size.	1:15,000 – 30,000
Neighbourhood house	Shire	Community building which has a range of services and programs that occur on a regular basis.	1:20,000 – 50,000
Youth centre	Shire	Dedicated youth space which can include space for recreation, education and cooking facilities.	1:20,000 – 50,000
Regional art gallery	Shire	Space dedicated for the display and exhibition of art. Differs from a branch library based on its larger size.	1:30,000 – 150,000
Performing Arts / Exhibition Centre / Convention Centre	Shire	Provides a regional venue for a range of programmed activities such as conferences and large theatrical performances.	1:50,000 – 200,000
Museum / Historical centre	Shire	Provides dedicated space for the appreciation of historical landmarks or items.	1:30,000 – 120,000

Community infrastructure category	Locational catchment	Description	Rate of provision (population and area based)
Open space			
Community park	Local	Parks that are predominantly developed for general recreation. These parks provide basic amenities for local use.	2 - 3ha:1,000 In this benchmarking, the median has been adopted: 2.5ha:1000
	Shire	Parks that are predominantly developed for general recreation and community use. These parks may include active elements such as playgrounds, spaces for young people or outdoor gyms that are located in serve the wider community.	
Sporting facilities			
Sport	District^	Spaces developed for formal organised sport. There are formal organised sport facilities located in/ serving villages and small towns – these have been included in the district category.	1.5ha:1,000
	Shire	Spaces developed for formal organised sport.	
Aquatic	District	Public swimming facilities, owned/ managed by Council; leased or operated by a third party.	Included in land provision for Sport (District and Shire)
Special	N/A	Public land developed for special purposes such showgrounds horse or car racing.	Nil – Special facilities are generally opportunistic facilities that the reflect the context of the community it is provided within.
Other	N/A	Other open space and formed drains including buffer lands, undeveloped open space, overland flow paths or where the purpose is unknown.	Nil

* Note: The rates of provision for community facilities were altered from the original standards to reflect the types of community facilities present in the Macleay Valley as well as incorporating additional local facilities in the absence of district catchments.

[^]Note: As discussed in Section 4.2, community infrastructure will be benchmarked at a Shire-wide and local level. To assist with the future stages of the CIP district sporting facilities have been identified as a facility type using professional reasoning in the absence of an adopted hierarchy.

4.2 Community infrastructure catchments

Community infrastructure catchments are defined areas used to understand the likely users and role of community infrastructure. For example, local catchments are a smaller scale and generally include those facilities, spaces and services which people use on a regular basis. While higher level catchments include larger scale facilities, sometimes purpose-built, which serve the wider community.

Given the dispersed nature of the Macleay Valley and its key townships, and the size of the current and forecast population, local and Shire wide catchments have been adopted. These catchments are defined below:

1. Shire – Whole of Kempsey Local Government Area (LGA)
2. Local – Based on the profileID small areas.

Refer to Figure 3 below for the locations of the above catchments.

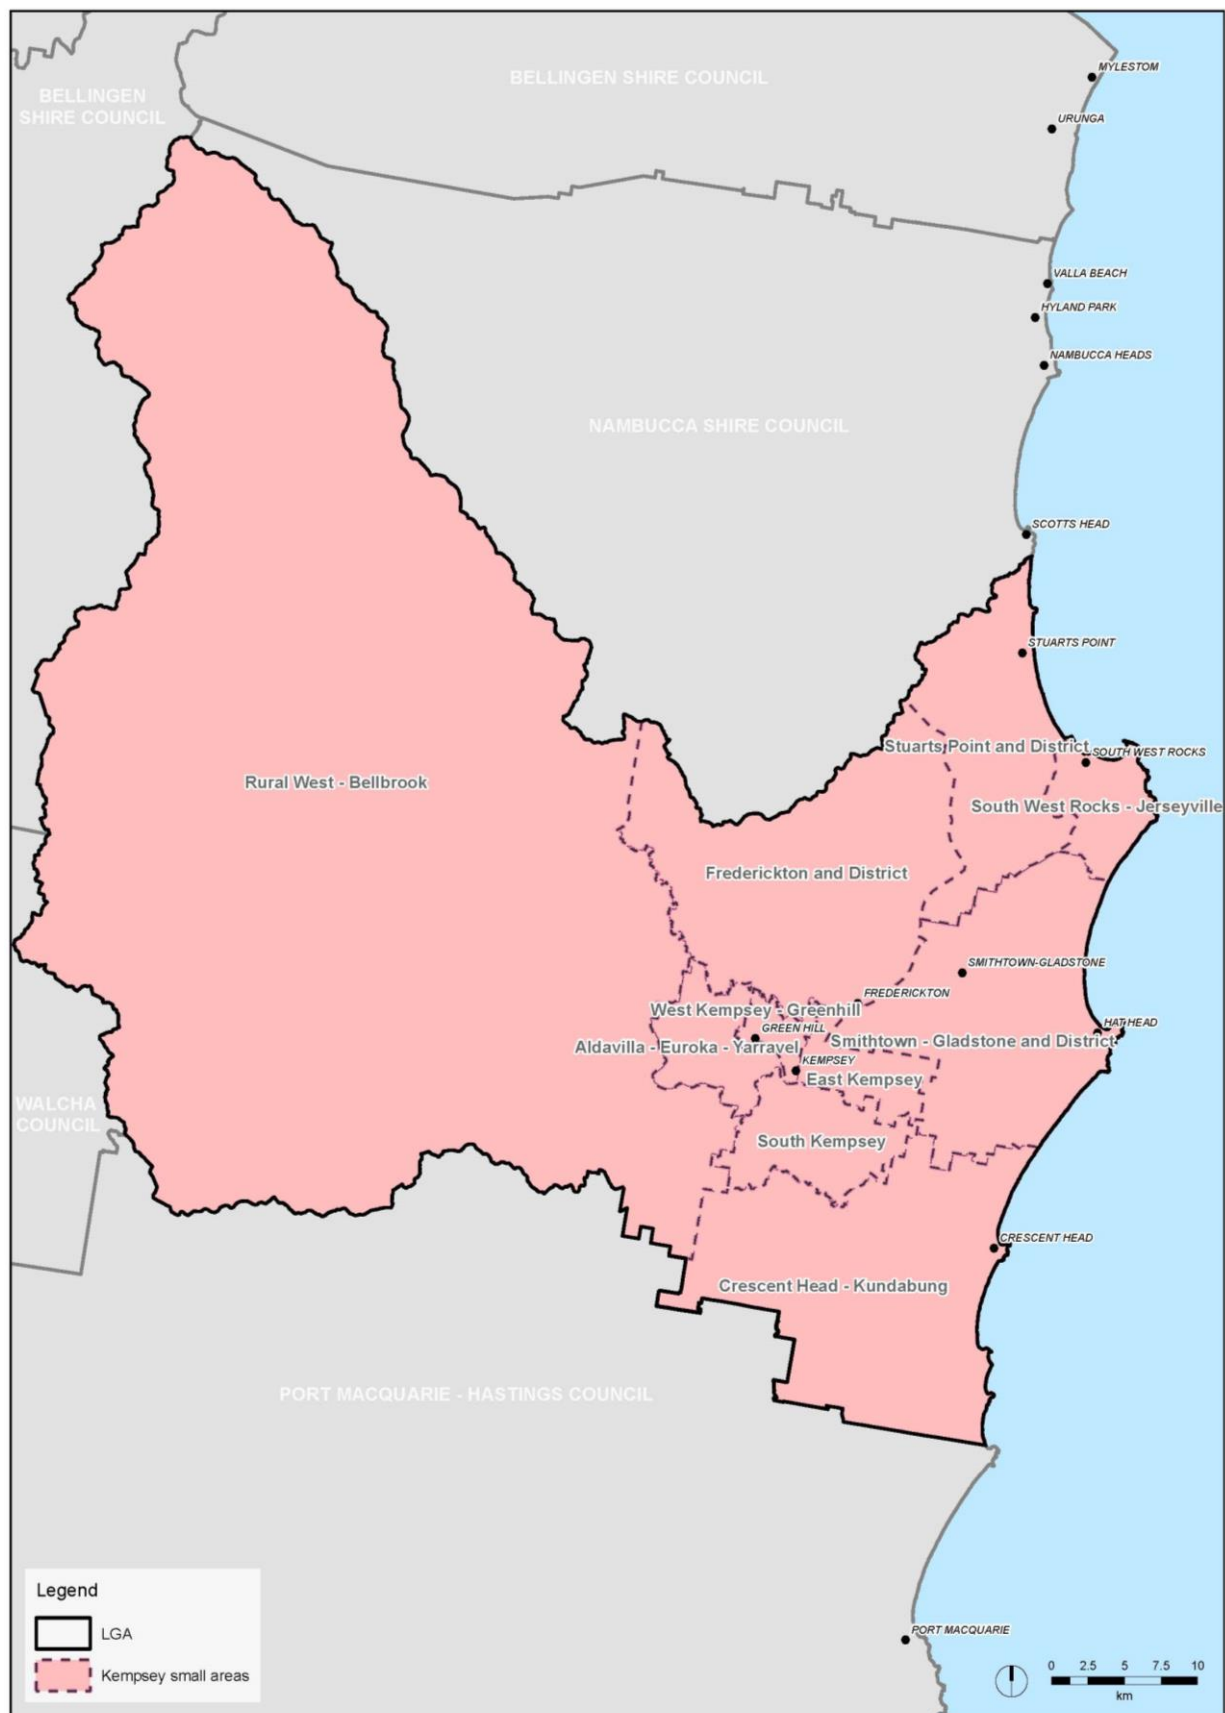

Figure 3: Map of Shire and Local Catchments

4.3 Community infrastructure audit results

The subsequent sections contain the results of the audit assessment. It includes presentation following information by catchment:

- Key population and demographic characteristics (current and future)
- Existing supply and distribution of community infrastructure
- Results of application of adopted rates of provision for benchmarking

For the purpose of the community infrastructure audit only Council community infrastructure was benchmarked.

To assist in the interpretation of these results a traffic light approach has been adopted. Figure 4 demonstrates how to interpret the community infrastructure audit results.

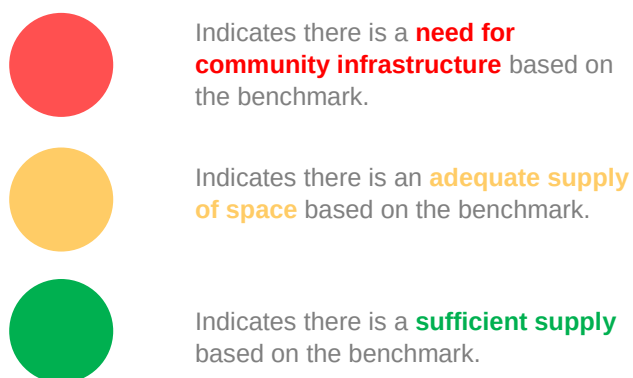

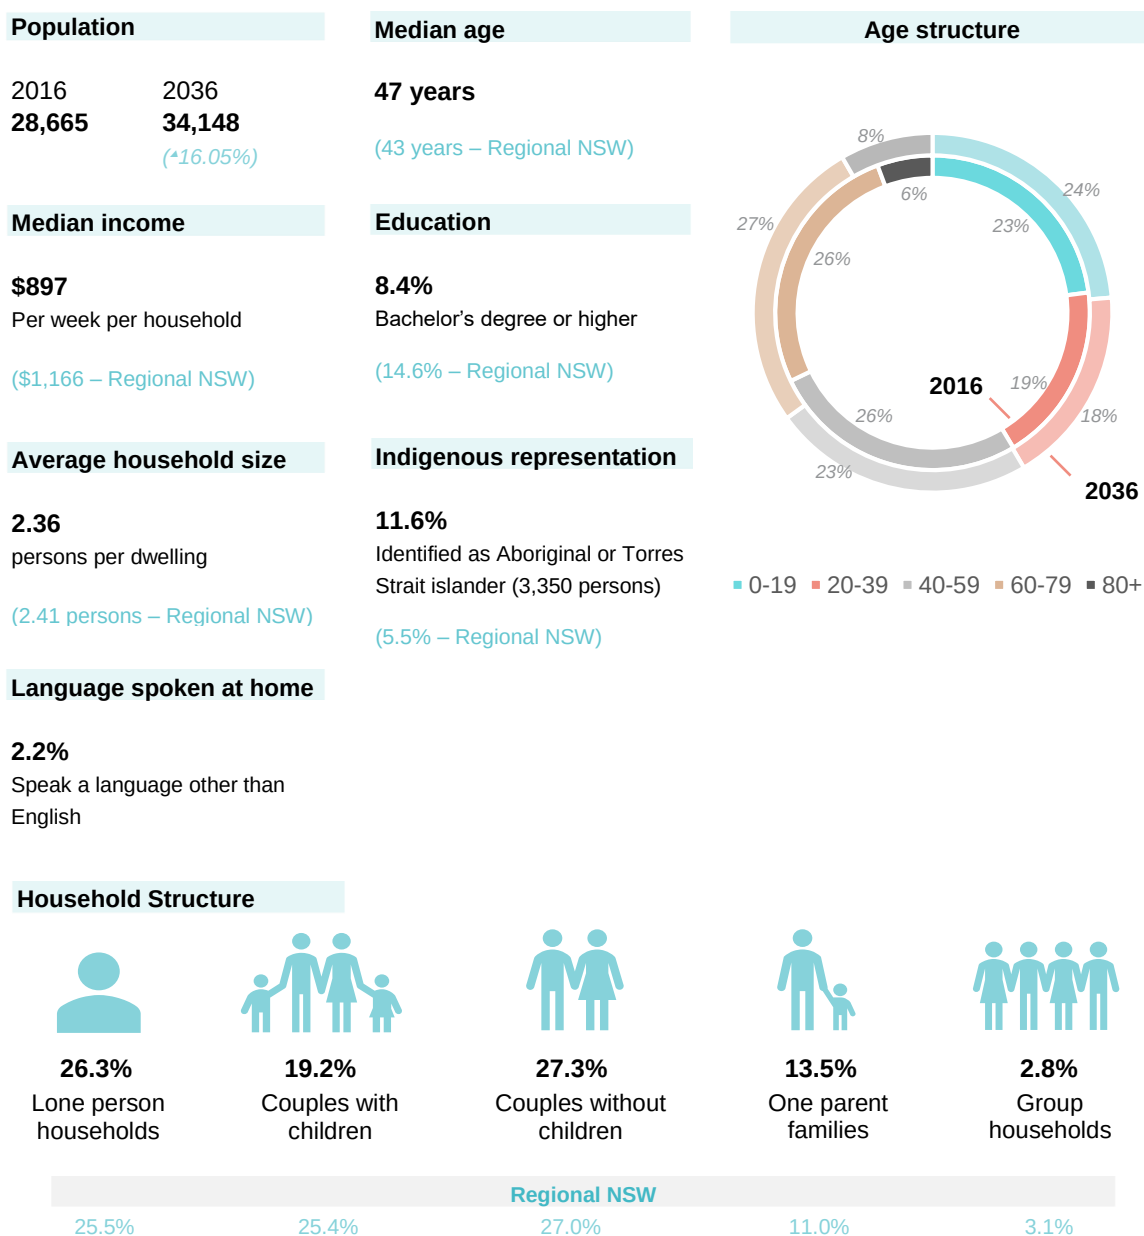

Figure 4: Benchmarking interpretation diagram

5.0 Macleay Valley

5.1 Community profile

Key demographic characteristics of the Macleay Valley are:

- Contains **mainly smaller households** with a high proportion of couples without children and lone person households. There are also higher proportions of single parent families than the Regional NSW average.
- The **population is generally older**, with the median age (47) five years above the average for Regional NSW.
- There is a **steady rate of growth** predicted in the Macleay Valley between 2016 and 2036.
- The population generally has **comparatively lower incomes** than the Regional NSW average.
- It has a **higher representation of Aboriginal or Torres Strait Islanders** than other areas of Regional NSW.

5.2 Community infrastructure audit

Community infrastructure within the Macleay Valley Shire is illustrated in Figure 5. Refer to Appendix B for an enlarged version of the below map.

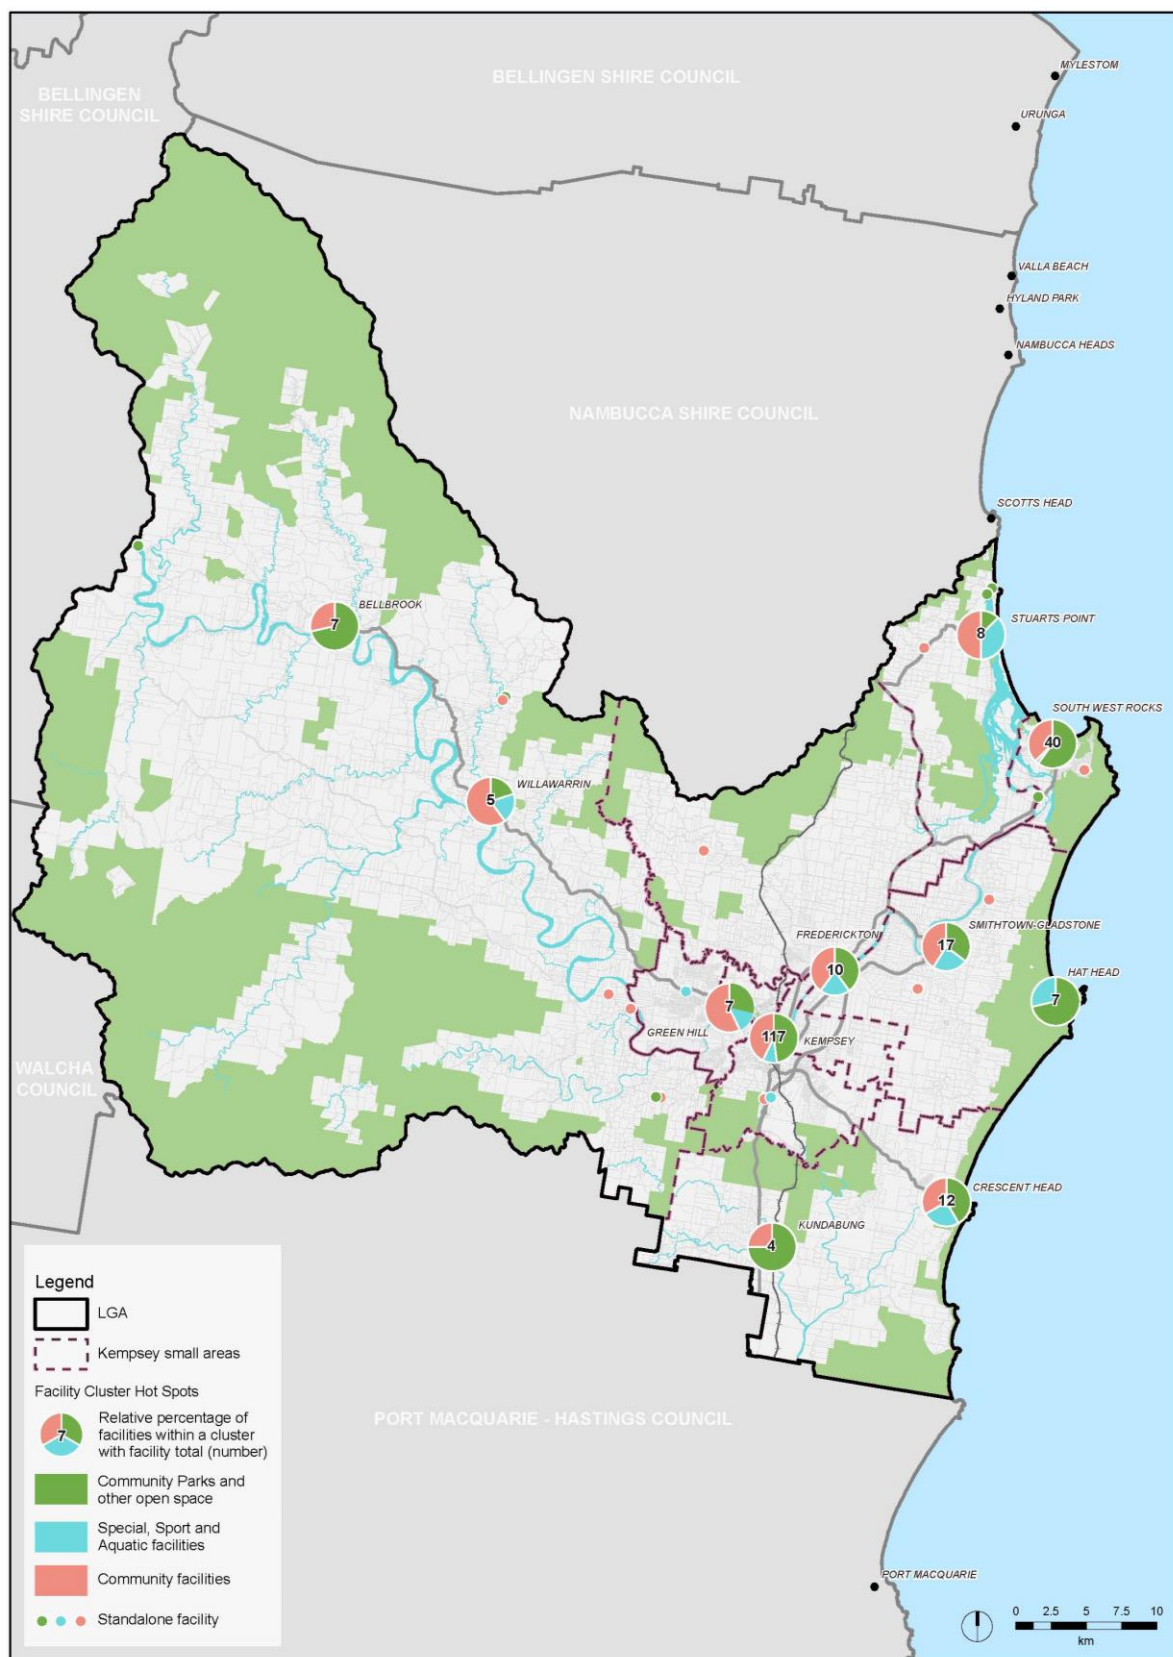

Figure 5: Map of community infrastructure in the Macleay Valley Shire

5.3 Overview of community infrastructure

Table 2 below summarises the number of community facilities and size/area of open space and sporting facilities within the Macleay Valley. The list includes privately owned/operated facilities (e.g. childcare, aged care, medical services) that have not been included in the benchmarking exercise.

Refer to Appendix A – Community Infrastructure Audit for a full list of facilities.

Table 2: Summary of Community Infrastructure

Facility type	Number of facilities	Notes
Community facilities		
Administration	2	Court house, Corrections Office
Aged Care	6	Aged care, nursing homes, community centre, assisted living
Aquatic Facility	4	Aquatic centre
Arts and Culture	13	Art gallery, museums, visitor and tourist centres, movie theatre
Community Space	16	Community halls, community centre
Early Years	18	Preschool, child care centres, day care, kindergarten
Education	23	Primary and high schools, preschool, TAFE, college
Emergency	7	Hospital, Fire station, SES, Police station
Health	10	Medical centres, health centre and support services
Library (Shire and Branch)	4	Libraries
Neighbourhood Centre	2	Support service, community centre
Showground	1	Fairground
Social Support	3	Social services, non-profit organisations
Special	3	Sports facilities -dirt bike track, race track, gun club
Sport Facility	27	Tennis courts, sportsgrounds, ovals, golf clubs, squash centre, skate parks
Youth	1	PCYC

Facility type	Area (ha)	Notes
Open Space and sporting facilities		
Community Park - Local	34.32	Parks, playgrounds, picnic areas, reserves, boat ramps
Community Park - Shire	72.17	Reserves, lookouts, playgrounds, boat ramps
Community Park - Other	126.47	Formed drains, buffer lands, undeveloped open space, overland flow paths
Sport – District	118.25	Formal sporting fields, courts and facilities
Sport - Shire	5.13	Formal sporting fields, courts and facilities
Sport – Special	50.76	Sports facilities -dirt bike track, race track, gun club

5.4 Community infrastructure provision and needs

Table 3 presents the benchmarking results by community infrastructure type.

Table 3: Macleay Valley benchmark need for Shire wide community infrastructure

Facility type	Rate of provision – Facilities to population ratio	Current provision	Benchmarked need		
			2016	2026	2036
Library (Shire)	1:15,000 - 30,000	1	-0.02 – 0.96	0.04 – 1.09	0.13 – 1.28
Neighbourhood centre	1:20,000 - 50,000	2	-1.41 – -0.53	-1.37 – -0.44	-1.32 – -0.29
Youth Centre	1:20,000 – 50,000	1	-0.41 – 0.47	-0.374 – 0.56	-0.317 – 0.71
Regional art gallery	1:30,000 – 150,000	0	0.20 – 0.98	0.20 – 1.04	0.22 – 1.14
Performing Arts Exhibition / Convention Centre	1:50,000 – 200,000	0	0.15 – 0.59	0.15 – 0.63	0.17 – 0.68
Museum	1:30,000 – 120,000	2	-1.75 – -1.02	-1.73 – -0.96	-1.71 – -0.86

Table 4 below presents the benchmarking results for open space and sporting facilities.

Table 4: Macleay Valley benchmark need for local catchment open space and sporting facilities

Facility type	Rate of provision – Facilities to population ratio	Current provision	Benchmarked need		
			2016	2026	2036
Community Park					
Local	2.5ha: 1,000	18.68	73.6	78.2	85.4
Shire		76.66			
Other Open Space	Nil	108.78			
Sport					
District	1.5ha:1,000	54.64	44.2	46.9	51.2
Shire		5.13			
Special		3 (#) 42.85ha			

Note: Current provision of other open space has not been included in the determination of the benchmarked need. These spaces provide opportunity for further development to meet recreation needs of the community.

Note: Areas within Kempsey District are coastal communities, with the beach providing service as open space, but the areas of accessible beach have not been included in the provision rate calculations.

Key findings of the community infrastructure audit for the Macleay Valley Shire catchment are:

- The population of the Shire is forecast to grow by approximately 5,500 residents over the next 20 years.
- The Shire has a slightly older median age than the Regional NSW average.
- The Shire is generally well serviced by community infrastructure. Benchmarking indicates that the Shire could benefit from a regional art gallery and library.
- Community infrastructure is generally clustered within townships, there are few facilities and spaces located outside of settlements.
- Kempsey and South West Rocks are key service centres within the Shire; containing the largest number of facilities, services and spaces.
- Kempsey Shire has approximately 155Ha of sport, recreation and open space land; this represents a provision level of 5.4Ha per 1,000 population in 2016 and 4.5Ha per 1,000 by 2036.

Acknowledging the recent Macleay Valley Sports Strategy (2017) which provides a facility planning and delivery program for new sporting facilities, key findings from this strategy are as follows:

- Council have no adopted service levels which can create inequality in service levels between sporting clubs.
- There are no dedicated/centralised administration/management resources for the provision of sport service, with responsibility shared amongst several Council officers.
- Supply analysis and indicative utilisation levels show that, in general, there is no need for additional fields for the exception of South West Rocks.
- Based on consultation with sporting groups there is a high utilisation of the South West Rocks Sporting Complex i.e. 43 hours per week which is above industry standards of 25 – 35 hours per week. The strategy estimates an additional 6Ha of additional sport areas by 2036 to address this issue.
- Sport assets require improvements to sports lighting, playing surface and associated amenities.
- Participation in organised sport is generally static but there is growing demand for social forms of participation in sport.
- Volunteerism is declining in many sport and recreation organisations. This is placing greater pressure on the remaining volunteer base and may impact on participation levels and/ or costs in future if services that were once provided voluntarily need to be paid for.

It is also important to acknowledge the role of the nearby regional centres of Port Macquarie and Coffs Harbour that are respectively located approximately 50km and 105km from Kempsey. These centres also contain a range of community facilities and services which support the Kempsey Shire network.

6.0 Local Catchments

6.1 Aldavilla – Euroka – Yarravel

Community profile

Key demographic characteristics of the Aldavilla – Euroka – Yarravel local catchment are:

- It is currently a **young and family-oriented community** with a higher proportion of households with children and without children. However, the population is forecast to significantly age over the next 20 years.
- The **population of the catchment is steady** and will experience minimal growth in the future in comparison to the wider Macleay Valley.
- It has **comparatively higher incomes** than other areas of the Macleay Valley.
- It has a **higher representation** of Aboriginal or Torres Strait Islanders when compared to the wider Macleay Valley.

Table 6 below presents the benchmarking results for community parks.

Table 6: Aldavilla-Euroka-Yarravel benchmark need for local catchment community parks

Facility type	Rate of provision – Facilities to population ratio	Current provision	Benchmarked need		
			2016	2026	2036
Community Park					
Local	2.5ha: 1,000	0	7.6	7.5	7.8
Shire		0			
Other Open Space	Nil	0			

Note: Current provision of other open space has not been included in the determination of the benchmarked need. These spaces provide opportunity for further development to meet recreation needs of the community.

Key findings of the community infrastructure audit for the Aldavilla – Euroka – Yarravel catchment are:

- Existing community facilities and services in Aldavilla-Euroka-Yarravel is limited to a primary school and Target Clay Club.
- There is no open space within the catchment; the Crown reserve estate could be reviewed for potential for public access to provide additional local open space opportunities.
- Benchmarking indicates there is no need for additional community facilities or services to serve the local catchment.

6.2 Crescent Head - Kundabung

Community profile

Key demographic characteristics of the Crescent Head - Kundabung local catchment are:

- It is a **young and family-oriented community** with a high proportion of households with children and lower proportion of lone person households.
- Higher household incomes and levels of education (university qualification)** when compared to the wider Macleay Valley.
- Lower proportion** of Aboriginal or Torres Strait Islanders live in the area.
- The population will grow slightly over the next 20 years and the community is **aging**. Residents aged 60+ making up 34% of the population in 2036, compared to 27% today.

Branch Library	1:6,000 – 15,000	0	0.14 – 0.36	0.2 – 0.37	0.16 – 0.41

Table 8 below presents the benchmarking results for community parks.

Table 8: Crescent Head-Kundabung benchmark need for local catchment community parks

Facility type	Rate of provision – Facilities to population ratio	Current provision	Benchmarked need		
			2016	2026	2036
Community Park					
Local	2.5ha: 1,000	0.1	5.5	5.6	6.2
Shire		53.0			
Other Open Space	Nil	0.99			

Note: A proportion of this local area is a coastal community, with the beach providing service as open space, but this area has not been included in the provision rate calculations.

Note: Current provision of other open space has not been included in the determination of the benchmarked need. These spaces provide opportunity for further development to meet recreation needs of the community.

Key findings of the community infrastructure audit for the Crescent Head – Kundabung local catchment are:

- Community infrastructure is dispersed throughout Crescent Head.
- Benchmarking results indicate there is an adequate supply of community infrastructure and community parks in Crescent Head – Kundabung, which will meet the future needs of the community.
- Being a small coastal community, with potentially high tourism value; open space opportunities are likely to cater for broader population than the residents. Overall, provision is high on a per capita basis as small communities will traditionally have higher than benchmark provision rates in order to provide a baseline service easily accessed by residents.

6.3 East Kempsey

Community profile

Key demographic characteristics of the East Kempsey local catchment are:

- It is a **young and family-oriented community** with a higher proportion of households with children and single parent families. In Macleay Valley 24% of people are aged 0-19, compared to 28% in East Kempsey.
- There are a high proportion of lone person households compared to the Macleay Valley average.
- There is a **similar rate of growth** to the wider Macleay Valley and the population will grow slightly over the next 20 years.
- Has a **lower representation** of Aboriginal or Torres Strait Islanders.
- There are a **higher proportion of residents who speak a language other than English at home**, compared to the Shire average.

Shire		15.5			
Other Open Space	Nil	0.3			

Note: Current provision of other open space has not been included in the determination of the benchmarked need. These spaces provide opportunity for further development to meet recreation needs of the community.

Key findings of the community infrastructure audit for the East Kempsey local catchment are:

- There is a range of community infrastructure provided throughout the catchment, however none of these are Council-owned and operated facilities and services.
- Benchmarking indicates there is an adequate supply of community infrastructure and community parks in the area.

6.4 Frederickton and district

6.4.1 Community profile

Key demographic characteristics of the Frederickton and district catchment are:

- It is currently a **younger community, which is forecast to age** in the future.
- It contains a higher **proportion of families with children and single parent families**. It also has a comparatively lower proportion of lone person households.
- There is a **high rate of growth** (almost 20% increase between 2016-2036) in comparison to the wider Macleay Valley.
- **Comparatively similar incomes** to other areas of the Macleay Valley.
- It has a **lower representation** of Aboriginal or Torres Strait Islanders.

6.4.3 Community infrastructure provision and needs

Table 11 below presents the benchmarking results by community infrastructure type.

Table 11: Frederickton benchmarking results for local catchment community infrastructure

Facility type	Rate of provision – Facilities to population ratio	Current provision	Benchmarked need		
			2016	2026	2036
Community Space	1:5,000 – 10,000	2	-1.77 – -1.54	-1.75 – -1.50	-1.72 – -1.45
Art Gallery	1:15,000 – 30,000	0	0.07 – 0.15	0.08 – 0.16	0.09 – 0.18
Branch Library	1:6,000 – 15,000	0	0.15 – 0.38	0.2 – 0.41	0.18 – 0.45

Table 12 below presents the benchmarking results for community parks.

Table 12: Frederickton benchmark need for local catchment community parks

Facility type	Rate of provision – Facilities to population ratio	Current provision	Benchmarked need		
			2016	2026	2036
Community Park					
Local	2.5ha: 1,000	0.75	5.7	6.2	6.8
Shire		0			
Other Open Space	Nil	1.11			

Note: Current provision of other open space has not been included in the determination of the benchmarked need. These spaces provide opportunity for further development to meet recreation needs of the community.

Key findings of the community infrastructure audit for the Frederickton and district catchment are:

- Community infrastructure is generally concentrated along Macleay Street.
- Benchmarking indicates the area is adequately serviced by community infrastructure, now and into the future. It is noted that there are numerous community spaces, relative to the size of the local population catchment.
- The existing sporting facilities within the Frederickton and district local catchment totals 16.1 ha. These facilities may provide an aspect of open space opportunity to address the local benchmarked shortfall in community parks.
- The average area of the existing four areas that comprise local community park and other open space is less than 5,000m². Local community parks less than this generally don't provide sufficient space for recreation and use and incur higher proportional maintenance costs.

6.5 Rural West - Bellbrook

Community profile

Key demographic characteristics of the Rural West - Bellbrook local catchment are:

- It has an **older population which will continue to age into the future**. Residents aged 60+ currently comprise 40% of the population, this is forecast to increase to 51% of the population in 2036.
- There are a **high proportion of couples without children**.
- Has a **lower representation** of Aboriginal or Torres Strait Islanders.

6.5.1 Community infrastructure

Community infrastructure within the Rural West - Bellbrook local catchment is illustrated in Figure 10. Refer to Appendix B for an enlarged version of the below map.

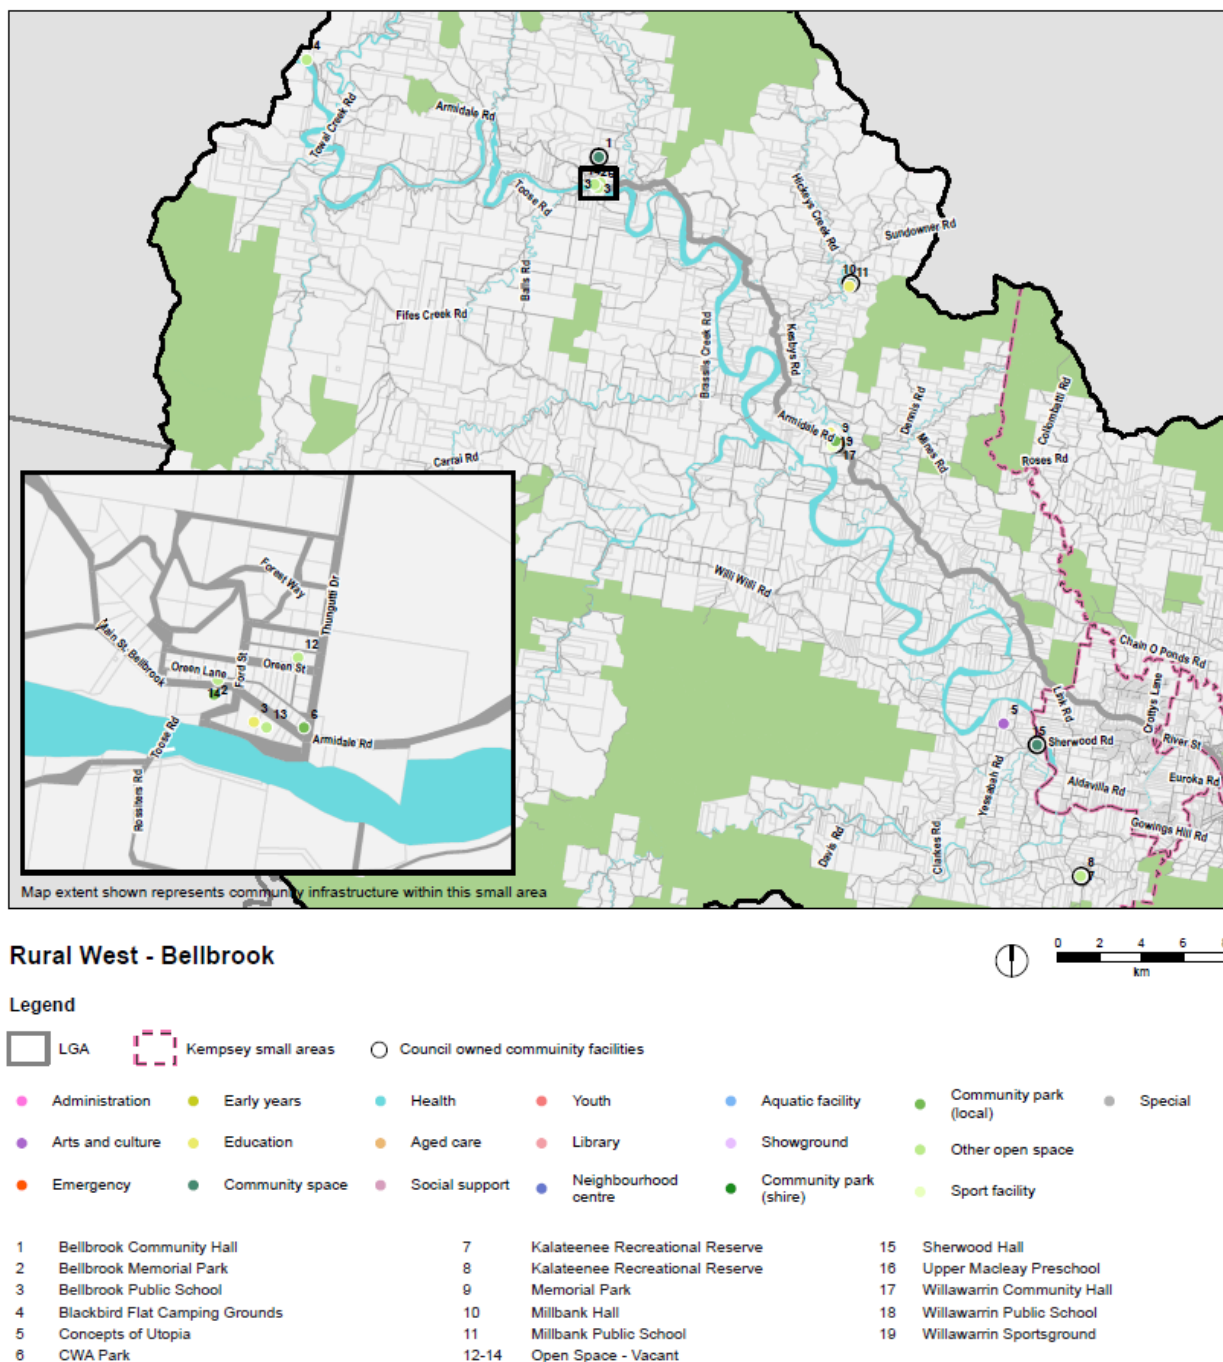

Figure 10: Rural West - Bellbrook Community Infrastructure

6.5.2 Community infrastructure provision and needs

Table 13 below presents the benchmarking results by community infrastructure type.

Table 13: Rural West - Bellbrook benchmarking results for local catchment community infrastructure

Facility type	Rate of provision – Facilities to population ratio	Current provision	Benchmarked need		
			2016	2026	2036
Community Space	1:5,000 – 10,000	5	-4.74 - -4.49	-4.74 - -4.48	-4.72 - -4.45
Art Gallery	1:15,000 – 30,000	0	0.08 – 0.16	0.08 – 0.17	0.09 – 0.18
Branch Library	1:6,000 – 15,000	0	0.16 – 0.41	0.2 – 0.43	0.18 – 0.45

Table 14 below presents the benchmarking results for community parks.

Table 14: Rural West – Bellbrook benchmark need for local catchment community parks

Facility type	Rate of provision – Facilities to population ratio	Current provision	Benchmarked need		
			2016	2026	2036
Community Park					
Local	2.5ha: 1,000	4.7	6.3	6.5	6.8
Shire		0			
Other Open Space	Nil	4.7			

Note: Current provision of other open space has not been included in the determination of the benchmarked need. These spaces provide opportunity for further development to meet recreation needs of the community.

Key findings of the community infrastructure audit for the Rural West - Bellbrook local catchment are:

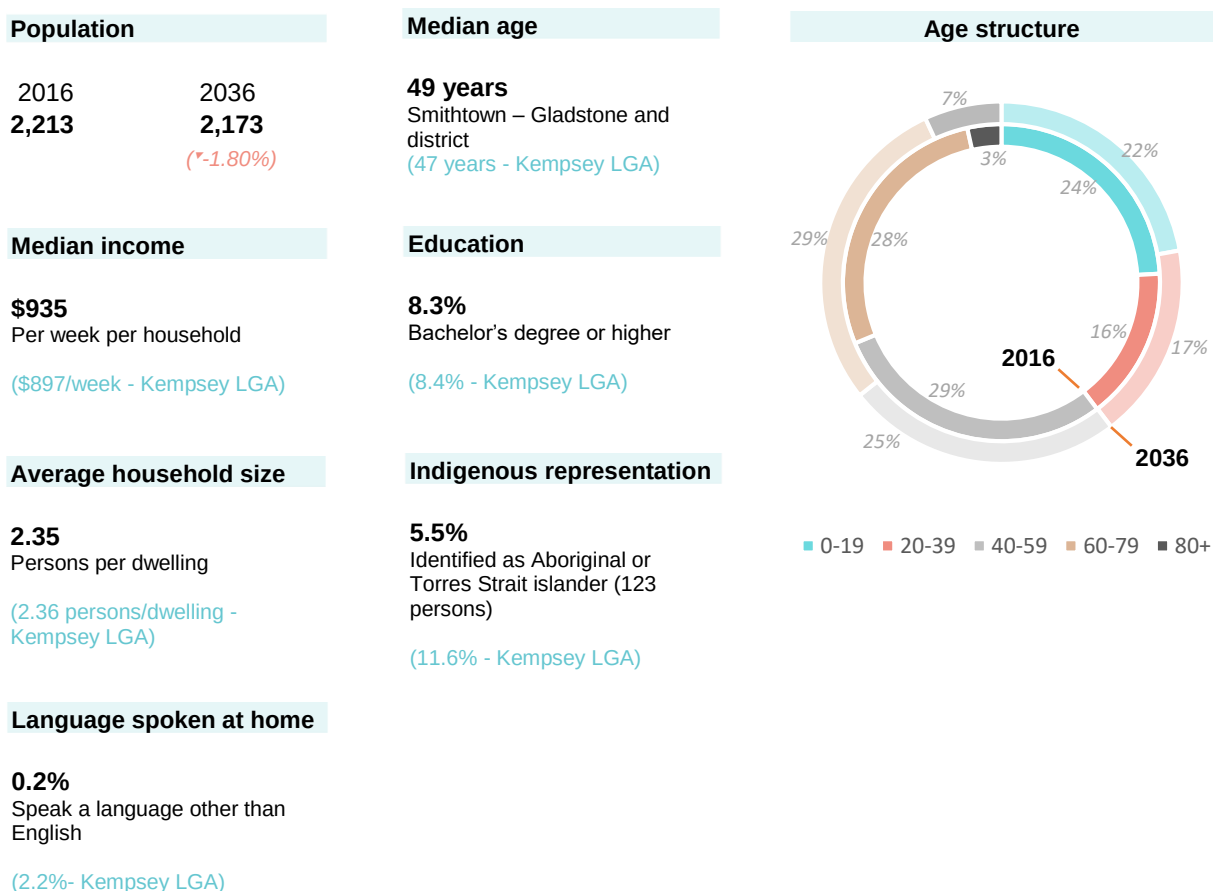

- There are a range of local community spaces (community halls) located throughout the catchment, servicing small rural populations.
- There are three public schools located at Bellbrook, Millbank and Willawarrin and a pre-school located within Willawarrin.
- Benchmarking shows there is an adequate supply of community infrastructure currently, and into the future.
- Further review of the 'Other open space' is recommended to determine potential to provide opportunities for public access and their categorisation as a local community park.

6.6 Smithtown – Gladstone and district

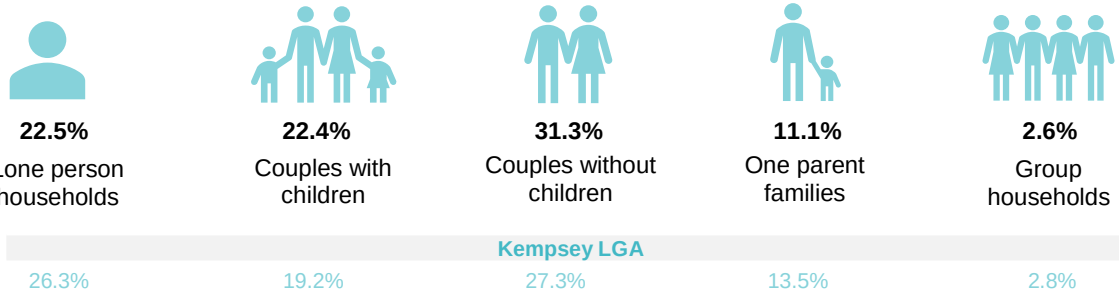

Community profile

Key demographic characteristics of the Smithtown-Gladstone local catchment are:

- It is a **family-oriented area**, with high proportions of families with children and couples without children currently living in the area.
- The community is **projected to decline slightly** over the next 20 years
- Comparatively similar incomes** to other areas of the Macleay Valley.
- Has a **lower representation** of Aboriginal or Torres Strait Islanders and other ethnic groups.

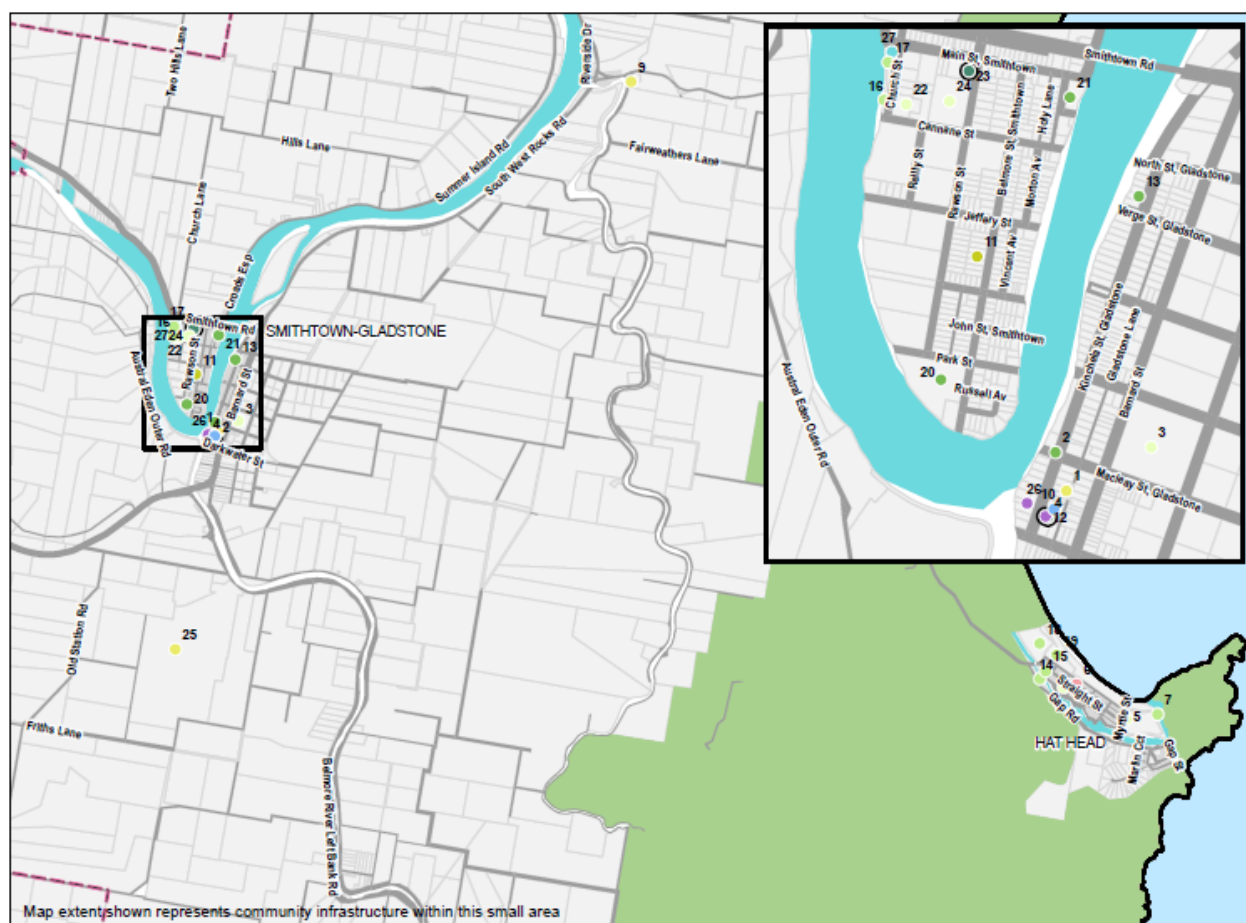

Household Structure

6.6.1 Community infrastructure

Community infrastructure within the Smithtown – Gladstone and district local catchment is illustrated in Figure 11. Refer to Appendix B for an enlarged version of the below map.

Facility type	Rate of provision – Facilities to population ratio	Current provision	Benchmarked need		
			2016	2026	2036
Community Park					
Local	2.5ha: 1,000	3.09	5.5	5.4	5.4
Shire		0			
Other Open Space	Nil	15.1			

Note: Current provision of other open space has not been included in the determination of the benchmarked need. These spaces provide opportunity for further development to meet recreation needs of the community.

Key findings of the community infrastructure audit for the Smithton – Gladstone and district catchment are:

- There is a range of community infrastructure provided in both Smithton and Gladstone. The latter has more of an arts and cultural focus, while the former has a greater range of parks. Both towns have a primary school.
- The benchmarking results indicate there the catchment is adequately serviced by community infrastructure.
- The existing sport facilities (5.3 ha) provide an aspect of open space opportunity, additional community park may be required to address the local benchmarked shortfall.
- Further review of the 'other open space' is recommended to determine potential to provide opportunities for public access.

6.7 South Kempsey

Community profile

Key demographic characteristics of the South Kempsey local catchment are:

- It is a **young and family-oriented community** with a significantly higher proportion one parent families and group households. There is a comparable proportion of families with children households.
- Comparatively lower incomes and lower rates of university attendance** than other areas of the Macleay Valley.
- One of the **highest representations** of Aboriginal or Torres Strait Islanders in the Macleay Valley.
- Unlike most areas in the Shire, the **population is forecast to remain young**, there is a marginal increase in older residents predicted by 2036.

Table 18 below presents the benchmarking results for community parks.

Table 18: South Kempsey benchmark need for local catchment community parks

Facility type	Rate of provision – Facilities to population ratio	Current provision	Benchmarked need		
			2016	2026	2036
Community Park					
Local	2.5ha: 1,000	17.7	6.2	6.4	6.9
Shire		5.8			
Other Open Space	Nil	1.7			

Note: Current provision of other open space has not been included in the determination of the benchmarked need. These spaces provide opportunity for further development to meet recreation needs of the community.

Key findings of the community infrastructure audit for the South Kempsey local catchment are:

- There is a range of community infrastructure located in the catchment, in particular there are several schools (private and government) and early years services.
- There are also several arts and cultural facilities located in the area, which primarily serve a tourist function.
- Benchmarking indicates there is currently an adequate supply of community infrastructure and community parks, now and in the future.

6.8 South West Rocks - Jerseyville

Community profile

Key demographic characteristics of the South West Rocks – Jerseyville local catchment are:

- It is a **key growth area** for the Shire. The population is anticipated to grow by half its size between 2016 and 2036.
- Currently has a **comparatively older population**, compared to the Shire average. The proportion of **children is forecast to increase** in the future.
- It is currently a **popular retirement destination**, with higher proportions of couples without children and lone person households.
- It has **comparatively similar incomes** to other areas of the Macleay Valley.

Table 20: South West Rocks – Jerseyville benchmark need for local catchment community parks

Facility type	Rate of provision – Facilities to population ratio	Current provision	Benchmarked need		
			2016	2026	2036
Community Park					
Local	2.5ha: 1,000	1.0	13.1	15.8	19.5
Shire		8.4			
Other Open Space	Nil	93.7			

Note: A proportion of this local area is a coastal community, with the beach providing service as open space, but this area has not been included in the provision rate calculations.

Note: Current provision of other open space has not been included in the determination of the benchmarked need. These spaces provide opportunity for further development to meet recreation needs of the community.

Key findings of the community infrastructure audit for the South West Rocks - Jerseyville catchment are:

- Community infrastructure is currently clustered around Livingstone Street and Gregory Street. There is also a range of facilities, services and spaces dispersed on the outskirts of the town centre.
- Benchmarking indicates there is an adequate supply of community infrastructure, currently and in the future.
- Further review of the 'other open space' is recommended to determine potential to provide opportunities for public access in addition to exploring potential to provide additional local community park opportunities.

6.9 Stuarts Point and district

Community profile

Key demographic characteristics of the Stuarts Point and district local catchment are:

- It is a **stable-sized community** and will grow marginally over the next 20 years.
- It has an **older population**, that will continue to age into the future. Residents aged 60+ currently make up 37% of the population, this will increase to 46% by 2036.
- **Comparatively lower incomes** to other areas of the Macleay Valley and a higher number of residents who have attended university.
- It has a **lower representation** of Aboriginal or Torres Strait Islanders.

			2016	2026	2036
Community Park					
Local	2.5ha: 1,000	0.8	3.9	4.0	4.1
Shire		0			
Other Open Space	Nil	55.1			

Note: Current provision of other open space has not been included in the determination of the benchmarked need. These spaces provide opportunity for further development to meet recreation needs of the community.

Note: A proportion of this local area is a coastal community, with the beach providing service as open space, but this area has not been included in the provision rate calculations.

Key findings of the community infrastructure audit for the Stuarts Point and district catchment are:

- There is an adequate supply of community infrastructure currently and in the future.
- Further review of the 'other open space' is recommended to determine potential to provide opportunities for public access.

6.10 West Kempsey - Greenhill

Community profile

Key demographic characteristics of the West Kempsey - Greenhill local catchment are:

- It is a **young and family-oriented community** with a significantly higher proportions of **one parent families, lone person households and group households**.
- It has **comparatively lower incomes and lower rates of university qualifications** than other areas of the Macleay Valley.
- The area comprises the **highest representation** of Aboriginal or Torres Strait Islanders in the Macleay Valley.
- The area is forecast to remain young – the proportion of **children and youth is forecast to increase** in the future.

6.10.2 Community infrastructure provision and needs

Table 23 below presents the benchmarking results by community infrastructure type.

Table 23: West Kempsey - Greenhill benchmarking results for local catchment community infrastructure

Facility type	Rate of provision – Facilities to population ratio	Current provision	Benchmarked need		
			2016	2026	2036
Community Space	1:5,000 – 10,000	1	-0.42 – 0.15	-0.03 – 0.21	-0.36 – 0.26
Art Gallery	1:15,000 – 30,000	0	0.19 – 0.38	0.20 – 0.40	0.21 – 0.42
Branch Library	1:6,000 – 15,000	1	-0.61 – -0.03	0.20 – 0.01	-0.57 – 0.05

Note: Facilities which refer to 'All' include facilities of this nature not owned or operated by Council but contribute to the rate of provision.

Table 24 below presents the benchmarking results for community parks.

Table 24: West Kempsey - Greenhill benchmark need for local catchment community parks

Facility type	Rate of provision – Facilities to population ratio	Current provision	Benchmarked need		
			2016	2026	2036
Community Park					
Local	2.5ha: 1,000	3.0	14.4	15.2	15.8
Shire		0			
Other Open Space	Nil	14.3			

Note: Current provision of other open space has not been included in the determination of the benchmarked need. These spaces provide opportunity for further development to meet recreation needs of the community.

Key findings of the community infrastructure audit for the West Kempsey - Greenhill local catchment are:

- There is a range of community infrastructure provided throughout the catchment, particularly provided by others (non-Council). Community infrastructure is generally clustered along Elbow Street and Tozer Street.
- There are a numerous schools, early years and health services provided through the area.
- The area is adequately provided with community infrastructure currently and into the future.
- Further review of the 'other open space' is recommended to determine potential to provide opportunities for public access.

7.0 Conclusion

The Macleay Valley Community Infrastructure Plan will provide a strategic and long-term plan to guide community infrastructure planning and delivery across the Shire. This plan will seek to ensure that residents and users are provided with a network of quality and responsive facilities, services and spaces which meet the needs of the community.

This report is the key output for Stage 1 of this project. It documents the approach and results of the community infrastructure audit. It is based almost solely on desktop analysis and does not consider the condition, use and capacity of existing facilities and services. Nor do the results reflect local values, aspirations or needs identified by local residents. The next project stage will include consultation with local providers and facility operators as well as members of the general public.

7.1 Key findings

Key findings from this assessment include:

- Kempsey is the largest town in the Shire and the key community service centre. It contains the highest order community infrastructure, including the hospital, high schools and library.
- South West Rocks is a secondary service centre. It has a sizeable and growing population and will continue to play an important role in the future.
- The Shire has strong linkages to the nearby regional centres of Port Macquarie and Coffs Harbour. Many residents access facilities and services in these locations
- The Shire has a number of smaller rural settlements, with varying extents of community infrastructure.
- Some townships, particularly coastal areas, experience fluctuations in population during holiday periods.
- The population of the Macleay Valley is predicted to age in the future. There are also pockets of socio-economic disadvantage. The plan must therefore consider access to local facilities and services as well as sustainable future delivery and management models.
- The Shire has a high proportion of Indigenous and Torres Strait Islanders. The values and needs of this cultural group must be a key component of the plan developed.
- The Shire contains a diverse range of community facilities, services and spaces. There are no significant gaps in the network based on the desktop assessment, however more detailed analysis is required to understand local demand, use and future need.

Community parks

- The Shire overall has sufficient community parks (benchmarked supply), however within the local catchments there are areas that are under and over supplied.
- There are a high number of “other” open spaces throughout the Shire, many of which are small sites with limited connection to the wider open space network.
- There may be opportunities to improve the open space network through the better utilisation of “other” types of community parks.

Sporting facilities

- Based on the benchmarking undertaken as part of this report the Shire overall has sufficient sporting facilities (benchmarked supply).

Key findings from the Macleay Valley Sports Strategy (2017) which will inform the future CIP:

- Council have no adopted service levels which can create inequality in service levels between sporting clubs.
- Supply analysis and indicative utilisation levels show that, in general, there is no need for additional fields for the exception of South West Rocks.
- Based on consultation with sporting groups there is a high utilisation of the South West Rocks Sporting Complex i.e. 43 hours per week which is above industry standards of 25 – 35 hours per week. The strategy estimates an additional 6Ha of additional sport areas by 2036 to address this issue.
- Sport assets require improvements to sports lighting, playing surface and associated amenities.

7.2 Next Steps

The next steps of the project are:

- Work with Council staff to compile anecdotal data relating to the condition, utilisation or standard of community infrastructure.
- Undertake consultation with the community to obtain feedback regarding use, expectation and aspirations for community infrastructure within the Shire.
- Prepare issues and opportunities discussion paper regarding the provision, management and quality of community infrastructure.
